Day 04
4 of 30 · Sundays holiday

Consultation, consent, photography & records
కన్సల్టేషన్, కన్సెంట్, ఫోటోలు & రికార్డులు

TODAY'S OBJECTIVES · ఈ రోజు లక్ష్యాలు

- Run a structured consultation that gets the real concern out
- Take legally sound consent and honest before/after photos
- Maintain client records the clinic can rely on

THEORY · థియరీ

The consultation frame

Open (name, what brings you today), explore (how long, what have you tried, what worries you most), history (medical, medication, allergies, previous procedures, pregnancy/breastfeeding), expectation (what result do you want, by when), explain (what is realistic, how many sessions, downtime), close (plan + next step). Never promise 100% clearance and never quote a price the doctor has not approved.

Consent

Consent is informed: procedure name, expected benefit, number of sessions, possible side effects (redness, swelling, pigmentation, rarely burns/scarring), alternatives and aftercare, in a language the client reads. Signed and dated before the first session, with a fresh consent for any new procedure. Photo consent is separate — never post a client photo without a written, ticked permission.

Records

One file per client: analysis card, consent, treatment log (date, area, machine, settings, reaction), products sold, photos, follow-up notes. Settings written down are what let you increase safely at the next session. 'I remember' is not a record.

Hands-on today

- Role play 3 consultations: acne teenager, melasma housewife, pre-wedding bride
- Fill a consent form completely and get it checked for gaps
- Photograph a volunteer at 3 angles and file them with the record

Safety & contraindications

- No consent = no procedure. No exceptions.
- Pregnancy, isotretinoin in last 6 months, active infection, keloid history → stop and ask the doctor

KEY POINTS TO REMEMBER · గుర్తుంచుకోవలసినవి

- Consent before every NEW procedure
- Photo consent is separate
- Log every setting you use
- Never promise 100%

Homework

Write a consultation script in Telugu and English for an acne client, 10 lines each.

Grooming & professional tip

Listen twice as much as you talk. The client's real worry (a wedding, a photo, a comment someone made) is what makes them come back.

SELF-CHECK · సెల్ఫ్ చెక్

- Did I follow hygiene and consent for every client today?
- Which step did I need help with — and what will I drill tonight?
- Did I write my records and settings before leaving?
